- The height of each model is based on the curb weight of a typically equipped unit on the standard chassis. The actual height of your vehicle may vary by as much as 2' depending on chassis or equipment variations.
- Minnie floorplans feature a wide-body design—over 96". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- Your motor home's load capacity is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motor home.
- Not all items available in combination. See dealer for details.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Awning is not available in Canada.
- Actual towing capacity is dependent on your particular loading and towing circumstances, which includes GVWR, GAWR, and GCWR as well as adequate trailer brakes. Please refer to your vehicle's operator's manual for further towing information.
- See your dealer for complete warranty information.
- Measurements are based on the most recent information available. See your dealer for updated specifications.

NA Not Available

S Standard

O Optional

Winnebago Industries<sup>®</sup> continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice. Comparisons to other motor homes are based on the most recent information available.

For more detailed information on the complete 2004 Winnebago Minnie lineup, refer to the 2004 Minnie brochure.

Seat belts are your most important hookup. Always buckle up.
